PROJECT'S

Note App :

- Note App Is a website In which a user can store Notes, Points which will be stored in the backend
- The User first have to create an account so that the data which he enters will be stored in his account only
- There are three main sections in the website "Home", "User Profile", "Logout" where the user details can be seen in the Profile section
- Note App Project Is done with Flask Frame work and Bootstrap

Covid-19 Website :

- Covid-19 Website Is a complete Frontend Work which includes Html,Css,Js
- The data used in this website is from the official website of "WHO"
- It is a very simple and reliable website which is not too heavy and not too crowded
- The main feature I have used in this website is interactive graph where the user can understand and even download the data and the graph gets updated everyday.

User-CRUD

- As the name itself says the project is all about entering a persons or student details which will eventually get stored in databsse
- The crud operations that I included in the website are
 - "VIEW" - Where the user can see the persons details,
 - "EDIT" - Where the user can edit/update the persons details,
 - "DELETE" - Where the user can detele the person Info
 - "RE-SIZE" - Where the user can re-size his profile picture
- The special feature In this project Is I have included a profile picture fiels where the user can upload his picture.

ACHIEVEMENTS

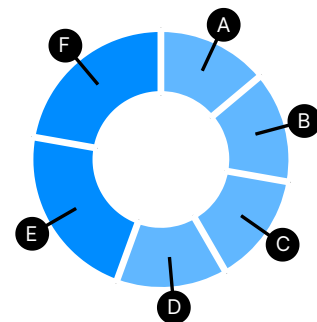

› I am an NCC cadet and I have done my training in "Sardhar Patel College" and my camp in "Parade Grounds"

› I participate in several session in our college which is about explaining our Ideas to the proffesors by which our team got selected to explain to JNTU proffesors

› In 2nd year of my engineering our college gave a project where we should build a real time project and explain it to entrepreneurs in which 5 teams got selected into final round in 49 teams

› In 1st year of my engineering our college conducted a Hackathon in which our team got first price in the entire college

MY TIME

- A Learning Coding Skills
- B Studying about space and universe
- C Looking For Real Time Projects
- D Sports
- E Reading Time Travel Stories
- F Building Projects

SKILL'S

• C

• Python

• HTML

• CSS

• Javascript

• Java

• Mysql

PASSIONS

I'm passionate about technology and space because its about building better world. World by definition help you do work. And the work that we're doing is ultimately about people. Making web sites help small businesses connect to their customers and non-profits connect to their members. I obsess over the newest gadgets for my smart home, but it's not about the gadgets, it's about enhancing and enriching in the universe which we live in
